

# Used Equipment

## EUI Poptest HH705.SH

**Description:**

The HH705 incorporates the Testmaster 3 (HH701) and EUI Poptest box (HK862).

The HH705 EUI Poptest provides a means for service workshops and garages to carry out functionality testing of new, repaired and remanufactured EUI's, checking for leaks, spray pattern, spray operation and nozzle opening pressure (NOP) in addition to all testing offered by the Testmaster 3.

The HH705 is sold as a complete unit and comes with a 3 months warranty on parts only.

Identification			
Model	Product	AE40	
Manufactured	2008	Manufactured	n/a
Serial number	70	serial number	7/A/1

Technical Specification	
User interface	Testmaster 3 HH701 Control Keypad & Display
Pressure reading	0 to 5000 bar
Resolution	1 bar
Accuracy	typically' $\pm$ 1% of fsd unless stated differently in the specific injector application sheet
HH705 Repeatability	typically' $\pm$ 1% of reading unless stated differently in the specific injector application sheet
HH701 Normal	Accuracy $\pm$ 1% of fsd*
High Pressure Pipe Connector	M14x1.5 flexible pipe
Electrical Supply	110/220-240 VAC/3A 50/60Hz (2 power points required)
Air Supply	5 to 6 bar, recommended air supply pipe diameter 10mm
Footprint	58cm x 70cm x 56cm
PC/Printer	RS232 connection
